

# HUNTINGDON

BEHAVIORAL HEALTH  
A Division of MCR Health

## About Us

Huntingdon Behavioral Health was founded to provide psychiatric and psychological care for older adults residing in assisted living and skilled nursing facilities in Florida. We serve older adults and their families in need of diagnosis and treatment of a mental health condition. Our program is developed to assist with behavioral and mental health challenges to achieve their highest level of independence and functioning.

We are a full-service behavioral health provider with a team of over 90 psychologists, psychiatrists, psych certified APRN's, and licensed clinical social workers in more than 220 skilled nursing, memory care, and assisted livings throughout the state of Florida.

Our psychiatrists and psychiatric nurse practitioners serve as consultants to the facility's attending physicians and nursing staff, lending their medical expertise to improve quality of care for their patients.

## SMARTPSYCH™ TREND REPORT

Learn about our exclusive and latest innovations in medication management

**Huntingdon Behavioral Health  
Corporate Headquarters**  
43 Barkley Circle suite, 201  
Fort Myers, FL 33907

## REACH YOUR GRADUAL REDUCTION GOALS!

Huntingdon Behavioral Health understands that psychiatric management at skilled nursing facilities is a multifactorial process. As you keep working with your interdisciplinary team to meet all CMS guidelines and mandates, it becomes important to stay ahead of the curve.

**YOUR MISSION:** continue to reduce psychotropic and antipsychotic medication use within your resident population.

**THE REALITY:** More and more of your residents have complicated behavioral and psychiatric presentations that require comprehensive medication management.

### MEET SMARTPSYCH™

*a free monthly report that provides an additional tool for psychotropic management utilization, in line with your facility's unique psychiatric needs.*

## GET SMART ABOUT PSYCH MEDS

**SPECIALIZED** - Analyzes psychotropic utilization data gathered from your facility EMR.

**MEASURED** - Catches data in real time, detailing trends in psychotropic utilization use.

**ANTIPSYCHOTIC** - Targeted at meeting and exceeding CMS antipsychotic reduction goals.

**REPORT** - Receive a tailored monthly report that facilitates acting on your goals.

**TREND** - Stay ahead of the curve when it comes to latest utilization trends within your facility.

### HOW DOES IT WORK?

Your custom-made report is sent to your facility and your interdisciplinary team monthly. Stay ahead of the curve and target increasing utilization by facility, unit, or by resident.

Get access to consultation from our pharmacy consultant who can attend your psychotropic and interdisciplinary team meetings. Maintain compliance, along with proper documentation that backs GDR'S decisions considering diagnosis, usage rates, and benefits vs. risks of continued medication use, which is analyzed weekly or monthly, depending on your facility needs.

We are the only behavioral health company in Florida with a Pharmacy Consultant dedicated to working with your facility prescribers and pharmacy consultants to drive improved outcomes through our exclusive **SMARTPSYCH™** trend reports and other initiatives.

## SMARTPSYCH™ BENEFITS

**Partner with the best in the business**, when it comes to psychotropic medication best practices and innovation. Huntingdon Behavioral Health has exclusive access to next generation cloud-based pharmacy software technology, which allows you to provide comprehensive, data driven, and person-centered care, with focus on reducing prescribed psychotropic medications.

**Receive monthly data** of your facility psychotropic medication usage. Improve outcomes and exceed utilization percentage reduction goals.

**Eliminate the need for long psychotropic meetings.** Let us do the hard work to bring you solutions that are based in hard data, targeted to help those we serve.

**Go from reactive to proactive.** Identify trends in your data BEFORE you receive CMS quarterly reports, to improve numbers in real time. Meet and exceed national and state antipsychotic reduction average requirements.

**Facilitate Compliance.** **SMARTPSYCH™** trend reports ensure continued compliance with CMS F-Tag 758 for appropriate diagnosis and gradual dose reductions (GDRs) of all psychotropic medications: Antipsychotics, Anxiolytics, Sedative/Hypnotics, Antidepressants, and off-label use of Mood stabilizers for behaviors.

*Enjoy these exclusive benefits at no added cost when you partner with Huntingdon Behavioral Health!*
